## Dryden MouldKiller

## Data Sheet

Eliminates the need to scrub or waterblast areas such as fibrolite, timber decks, tile and decromastic roofs, concrete driveways, paving stones, brickwork and most other porous surfaces confronted with moss, mould, etc. It has a residual effect allowing some active ingredient to stay active for a period of time.

JUST MIX IT, SPRAY IT AND LEAVE IT.

### DIRECTIONS FOR USE

In a garden spray, mix one litre of Dryden MouldKiller concentrate to five litres of water, making six litres. Spray affected areas and make sure of a thorough saturation for best affects.

Discolouration may occur during process. Area should start to show signs of self cleaning from 6-12 weeks. Re-apply at 12 months to help ongoing clean appearance. Concentrate dilution can be increased for areas with heavy growth.

### SAFETY

Do not mix with other chemicals.

Avoid all contact with skin (gloves) and eyes (safety goggles).

Avoid contamination of waterways, fish ponds and direct contact with plants.

Wash hands before eating, drinking or going to the toilet.

**Roofs:** disconnect water supply until a minimum of 50mm of rain has fallen or approx 4 weeks before re-connecting.
